

Equine Therapy

CREOKS offers veteran-specific Equine Assisted Psychotherapy at River Trail Ranch in Haskell, Oklahoma, which offers a peaceful setting where veterans can heal, grow and build confidence.

Engage in hands-on activities with horses that build trust, strengthen emotional regulation and enhance interpersonal skills. No horseback riding is involved and no prior experience with horses is required.

VETERAN SERVICES

CREOKS Veteran Services provides compassionate, evidence-based care for veterans and their families. As a team of veterans and intentionally trained passionate providers with a deep respect for military culture, we understand the challenges veterans face. The first step toward healing can be hard, but together, we can build a healthier, happier future.

Services

01

Counseling

Providing a safe space to unpack complex issues, CREOKS offers both one-on-one and group therapy for veterans and their families. Our programs provide therapeutic tools for veterans navigating life after military service.

02

Peer Support

No battle is won alone. Find community with other veterans with shared experiences. This is a safe place to share emotions and coping strategies.

02

Case Management

Get connected with services essential to developing the skills necessary for veterans to achieve and maintain independence. From housing to VA claims, CREOKS will connect you to the correct resources.

04

Medication Management

Physicians and nurses ensure veterans receive the correct amount of prescribed or warranted medication to benefit their health but also minimize potential harm.

05

Crisis Management

An alternative to hospitalization, our adult crisis recovery centers help veterans return to a pre-crisis level of functioning with a goal of support and stabilization.

Care in the Community

CREOKS is a Care in the Community (CITC) provider with the U.S. Department of Veterans Affairs, making it possible for veterans to access services through their VA benefits.

This partnership ensures veterans receive high-quality, culturally competent care close to home while reducing barriers to treatment.

Veterans are 1.5 times more likely to die by suicide.

”

Suicide Prevention

High exposure to stress, trauma, isolation and loneliness leads to high numbers of veteran suicides. Reintegrating into civilian life can be extra challenging.

From clinical interventions to crisis stabilization, CREOKS offers a safe place to turn when life feels overwhelming.
